

## Online dictionaries

### [PONS - User Friendly Dictionary](#)

The popular PONS dictionary has an exceptionally user-friendly interface. Along with the translation of the search term, you will also be shown phrases and expressions that contain the word or phrase you search for. Combine this dictionary with the free [PONS Vocabulary Trainer](#) to learn vocabulary efficiently!

### [Bab.la Dictionary - More than just the Translation](#)

Bab.la is more than a simple dictionary – alongside the translation of the search term you can also listen to the pronunciation, view synonyms, and read example sentences that contain the word or phrase you searched for.

### [Larousse - Monolingual French Dictionary](#)

This popular monolingual dictionary allows you to learn vocabulary at a higher level: you can learn new words with the help of definitions and example sentences. A high-quality dictionary with audio features.

### [Logos - Dictionary with Pictures](#)

Logos sets itself apart from other dictionaries by showing you images of the words you look up, which helps to reinforce the meaning of the word in your memory. The language combination is selectable, so you can also [translate from English into French](#).

### [Linguee - Definitions in Context](#)

Linguee provides you with many different examples of your search term from over a billion translated text sources. From the results you can see how the word or phrase you searched for is used in authentic contexts.

### [Dict.cc - Precise Results](#)

A clearly-structured dictionary with over 47,000 entries. Along with the translation of the search term, you are also provided with synonyms and common phrases containing the search term.

### [Ultralingua - Concise and Helpful](#)

This dictionary presents its results in a compact and concise manner. You are also shown sentences and phrases associated with the search term, which helps you to learn the context of new words.

## Freeware dictionaries for download

### [Lingoes - Translations across Programs \(Windows\)](#)

Lingoes provides free dictionaries for over 80 languages! You can add individual dictionaries to the program after the initial program installation. After proper configuration you can even translate words in other programs using a convenient keyboard shortcut (see instructions in the [Lingoes Manual \(English\)](#) and the [Text Capture Plugins](#) you will need for certain programs).
